

AMENDMENTS TO THE CLAIMS

This listing of Claims shall replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1-83. (Cancelled)

84. (Currently Amended) A system comprising:

a multi-component display comprising:

a first display screen; and

a second display screen overlapping said first display screen; and

a user interface component for designating selecting at least one of said ~~first and second display screens as an active~~ display screen for responding to an input, and wherein said at least one selected display screen comprises a display screen selected from a group consisting of said first and second display screens.

85. (Currently Amended) The system of Claim 84, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a mouse, a keyboard, and a joystick.

86. (Previously Presented) The system of Claim 84, wherein said user interface component comprises a touchscreen.

87. (Currently Amended) The system of Claim 84, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a pen and a stylus.

88. (Currently Amended) The system of Claim 84, wherein said user interface component is ~~operable to designate~~ further for enabling selection of said at least one active display screen in response to a sound.

89. (Currently Amended) The system of Claim 84, wherein said user interface component is operable to transition a display of a graphical object to said at least one active selected display screen.

90. (Currently Amended) The system of Claim 89, wherein said input is operable to adjust said display of said graphical object on said at least one active selected display screen.

91. (Currently Amended) The system of Claim 89, wherein said graphical object ~~comprises at least one~~ is selected from a group consisting of a cursor, an icon and an image.

92. (Previously Presented) The system of Claim 89, wherein said graphical object is associated with a gaming application.

93. (Currently Amended) The system of Claim 89, wherein said graphical object is selected from a group consisting of a graphical object associated with at least one of a drawing application and a graphical object associated with a graphical application.

94. (Previously Presented) The system of Claim 84, wherein said input comprises a user input.

95. (Previously Presented) The system of Claim 94, wherein said user input comprises an input to said user interface component.

96. (Currently Amended) A method of ~~designating at least one active~~ controlling display screen selection in a multi-component display, said method comprising:

detecting a first input ~~from~~ to a user interface component;

determining at least one display screen of said multi-component display associated with said first input; and

~~designating~~ selecting said at least one display screen of said multi-component display ~~as said at least one active display screen~~ for responding to a second input.

97. (Currently Amended) The method of Claim 96, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a mouse, a keyboard, and a joystick.

98. (Previously Presented) The method of Claim 96, wherein said user interface component comprises a touchscreen.

99. (Currently Amended) The method of Claim 96, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a pen and a stylus.

100. (Currently Amended) The method of Claim 96, wherein said user interface component ~~is operable to generate said first input in response to~~ comprises a sound.

101. (Currently Amended) The method of Claim 96 further comprising:
transitioning a display of a graphical object to said at least one active
selected display screen.
102. (Currently Amended) The method of Claim 101 further comprising:
detecting said second input; and
adjusting said graphical object displayed on said at least one active
selected display screen in response to said second input.
103. (Currently Amended) The method of Claim 101, wherein said graphical
object ~~comprises at least one~~ is selected from a group consisting of a cursor, an
icon and an image.
104. (Previously Presented) The method of Claim 101, wherein said graphical
object is associated with a gaming application.
105. (Currently Amended) The method of Claim 101, wherein said graphical
object is selected from a group consisting of a graphical object associated with at
~~least one of a drawing application and a~~ graphical object associated with a
graphical application.
106. (Previously Presented) The method of Claim 96, wherein said second
input comprises a user input.
107. (Previously Presented) The method of Claim 106, wherein said second
input comprises an input to said user interface component.

108. (Currently Amended) A computer-usable medium having computer-readable program code embodied therein for causing a computer system to perform a method of ~~designating at least one active~~ controlling display screen selection in a multi-component display, said method comprising:

detecting a first input from a user interface component;

determining at least one display screen of said multi-component display associated with said first input; and

~~designating~~ selecting said at least one display screen of said multi-component display ~~as said at least one active display screen~~ for responding to a second input.

109. (Currently Amended) The computer-usable medium of Claim 108, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a mouse, a keyboard, and a joystick.

110. (Previously Presented) The computer-usable medium of Claim 108, wherein said user interface component comprises a touchscreen.

111. (Currently Amended) The computer-usable medium of Claim 108, wherein said user interface component ~~comprises at least one~~ is selected from a group consisting of a pen and a stylus.

112. (Currently Amended) The computer-usable medium of Claim 108, wherein said ~~user interface component is operable to generate said first input in response to~~ comprises a sound.

113. (Currently Amended) The computer-usable medium of Claim 108, wherein said method further comprises:

transitioning a display of a graphical object to said at least one active selected display screen.

114. (Currently Amended) The computer-usable medium of Claim 113, wherein said method further comprises:

detecting said second input; and

adjusting said graphical object displayed on said at least one active selected display screen in response to said second input.

115. (Currently Amended) The computer-usable medium of Claim 113, wherein said graphical object ~~comprises at least one~~ is selected from a group consisting of a cursor, an icon and an image.

116. (Previously Presented) The computer-usable medium of Claim 113, wherein said graphical object is associated with a gaming application.

117. (Currently Amended) The computer-usable medium of Claim 113, wherein said graphical object is selected from a group consisting of a graphical object associated with ~~at least one of~~ a drawing application and a graphical object associated with a graphical application.

118. (Previously Presented) The computer-usable medium of Claim 108, wherein said second input comprises a user input.

119. (Previously Presented) The computer-usable medium of Claim 118, wherein said second input comprises an input to said user interface component.
